

A-SAFE

Retractable Barrier Tape Racking Kit

The rack-mounted retractable barrier kit reduces the risk of accidents and pedestrian injuries by temporarily preventing vehicle access to racking aisles during manual activities such as maintenance and rack inspection. Easy to deploy and highly visible, the yellow and black chevron puller tapes serve as both a visual warning and a physical barrier.

The kit is fully portable and comes with a robust carry case, while multiple mounting options ensure self-retracting reel units and receivers can be quickly deployed on a wide range of racking systems.

Compliant to the
global benchmark
in barrier safety

bsi. PAS 13
Code of Practice for
Workplace Safety
Barriers

Engineered for performance

2 x lockable self-retracting 9m tape reels

4 x receiver units

Attachment unit can be fitted using magnetic or cord-mounted fittings

Reverse of unit showing the magnetic attachments

Tape reel attached via magnetic fitting

Products supplied in a robust carry case
