

Bollard Bumper

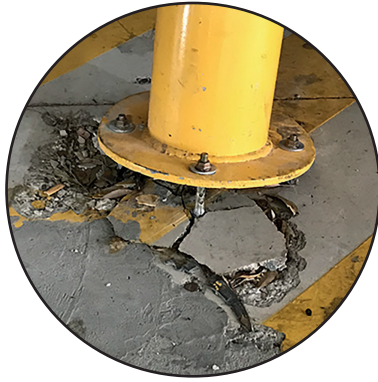

The Bollard Bumper protects existing cast-in bollards in a cost-effective, space-saving form.

Fitting around the bollard, the Bollard Bumper deflects impact energy, avoiding costly damage to vehicles and concrete, while preventing potential crush injuries.

Enhanced people safety

By reducing impact forces and ASI values, the Bollard Bumper minimizes potential crush injuries between PIT vehicles and bollards.

Reduced concrete failure

The bumper dissipates impact energy around the bollard, preventing premature failure, reducing long-term repair costs.

Cost-efficient

The Bollard Bumper fits around existing bollards, meaning no need for costly ground repairs and time-consuming installations.

Quick installation

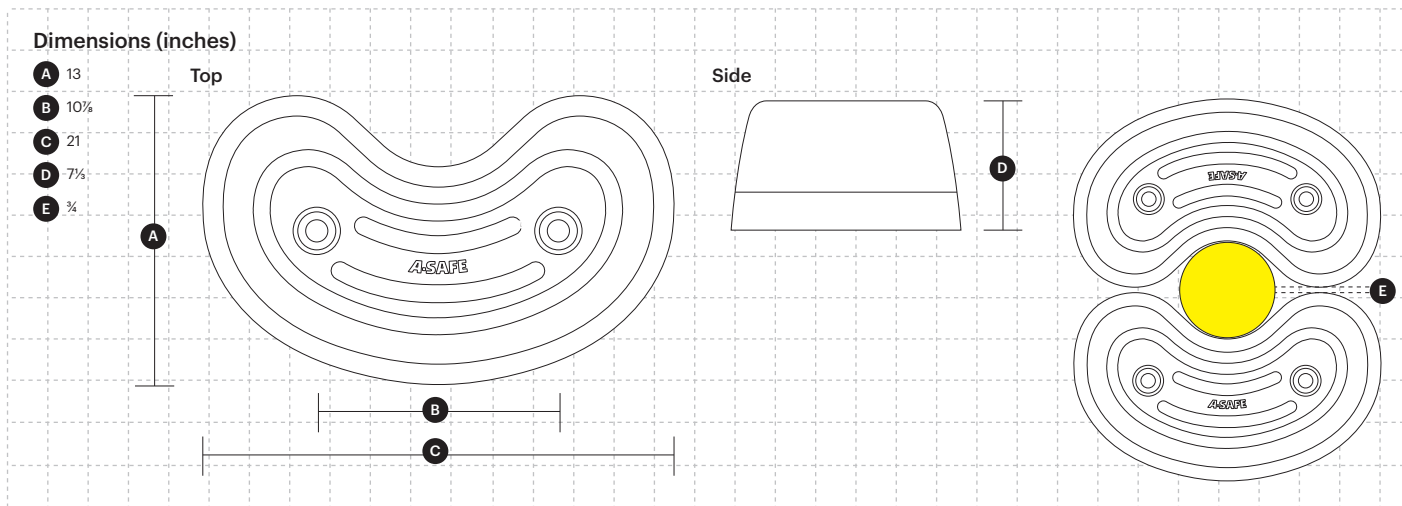

The efficient design ensures easy and quick installation without disrupting existing operations or requiring significant downtime.

Space saving

Designed for applications where space is at a premium, the Bollard Bumper protects bollards in a compact and space-efficient form.

Technical Information

A cast-in bollard protected around a doorway.
