

Belt Barrier Tape Racking Kit

Designed for mobile safety management, the Belt Barrier Tape Racking Kit enables teams to quickly cordon off racking aisles or work zones during maintenance or temporary closures. Housed in a sturdy, transportable case, this kit provides a fast, flexible solution to restrict access and maintain compliance where it's needed.

Strong magnetic attachments allow for rapid, tool-free installation onto racking or other steel structures.

Designed to be carried by one person, the sturdy case houses everything needed for fast deployment.

Ideal for use in maintenance, cleaning or temporary shutdowns in warehouse and logistics environments.

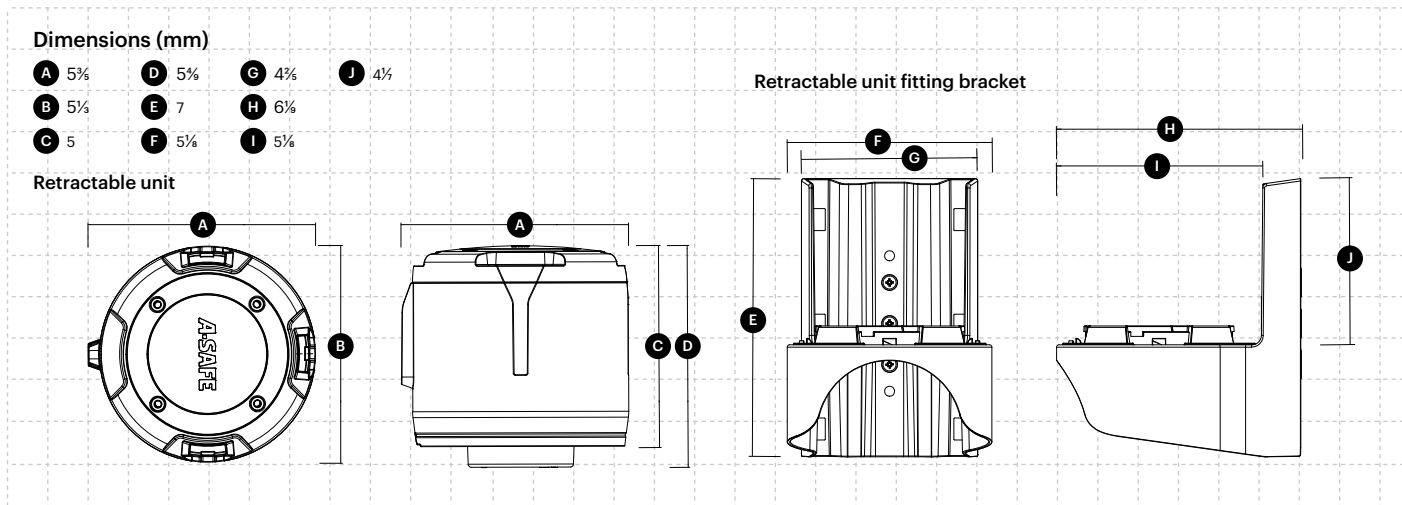

Up to 9m (29.5ft) of high tensile webbing clearly defines restricted areas to protect workers and prevent unauthorized access.

Racking Kit
Products supplied in a robust portable carry case
Contains:
2 x Belt Tape Units
2 x Attachment Units
2 x Receiver Units
8 x Magnets for easy fixing

Technical Information

Racking receiver unit attached to a metal beam.
