

Retractable Barrier Tape Post Kit

The post-mounted retractable barrier kit provides a temporary cordon to prevent access to walkways or zones within a facility. It rapidly controls the flow of traffic and is ideal for closing off an area for activities such as cleaning and maintenance.

The multi-directional, self-retracting barrier tape reel is universally compatible with any polymer barrier system and fits easily to post caps with a diameter of 3½ inches or more. The extendable fabric tape can be clipped in place using a multi-directional, post-mounted receiver or a vertical surface-mounted receiver.

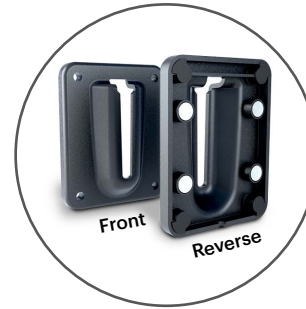

1 x lockable self-retracting
354 1/2 inch tape reel

1 x post receiver unit
Easy fit to any polymer
barrier post with a
minimum diameter of
3 1/2 inches.
