

Belt Barrier

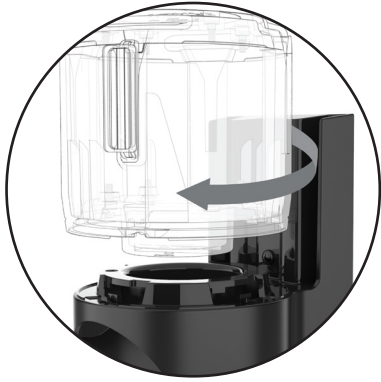

The Belt Barrier provides a dependable solution for restricting access and improving on-site safety. Designed for use between A-SAFE guardrails, walls, or a combination of both, these kits can be adapted to suit a wide range of environments.

With a consistent, professional appearance and a trusted retracting mechanism, these kits are ideal for creating clear, controlled boundaries in dynamic industrial areas.

Suitable for a wide range of temporary or semi-permanent access control needs across different areas of a facility.

Easy installation. Twist-and-lock the retractable tape into place for a secure fitting to the bracket.

Multiple units can be linked together to span longer distances or cover larger access points.

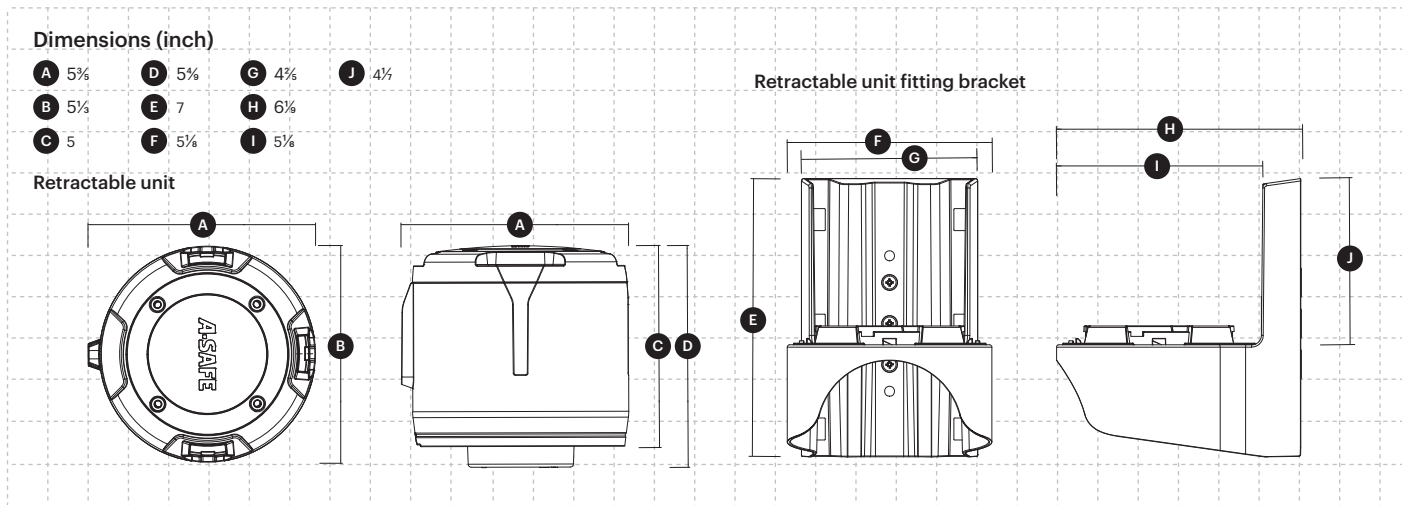

Up to 9m (29.5ft) of high quality tape webbing ensures a smooth retraction, eliminating tangling and reduces sag.

Built to perform in demanding environments, offering durability and dependable performance over time.

Technical Information

Please note: The Retractable Barrier webbing will sag when pulled out to the following widths. (Sag measurements are approximate).

Total webbing width	Amount of sag
10ft	1"
15ft	2.7"
16ft	3.1"
23ft	5.1"
29ft	5.9"
